ROVER

R-5WP

UHF/VHF TWO-WAY RADIO

PROFESSIONAL COMMUNICATION YOU CAN RELY ON

BUILT FOR PROFESSIONALS. MADE TO **PERFORM**.

The ROVER R-5WP is a rugged, high-power two-way radio engineered for demanding environments where reliability and durability are critical. With 10W transmission power, dual-band UHF/VHF capability, and waterproof protection, it ensures clear and uninterrupted communication for security teams, construction sites, marine operations, industrial facilities, and more.

Equipped with advanced features and a high-capacity battery, the R-5WP keeps you connected and in control—anytime, anywhere.

WATERPROOF DESIGN

Reliable operation in rain, wet & harsh environments

DUAL BAND UHF/VHF

144–146 MHz (VHF)
430–440 MHz (UHF)
for flexible communication

10W HIGH POWER

Extended range & strong signal penetration through obstacles

256 CHANNELS CAPACITY

Efficient team coordination & organized communication

3600mAh BATTERY

Long-lasting performance for extended work shifts

WATERPROOF SERIES

TECHNICAL SPECIFICATIONS

FEATURES	DESCRIPTION
Product Model	ROVER R-5WP Waterproof Dual Band Two-Way Radio
Frequency Bands	VHF 144–146 MHz / UHF 430–440 MHz
Channel Capacity	256 Channels
Output Power	10W
Battery Capacity	3600mAh
Operating Voltage	7.2 VDC
Dimensions	120 × 55 × 33 mm
Weight	235g
Signaling	DTMF Encoding & Decoding, CTCSS, DCS
Display	1.77" Color Display
Additional Features	FM Radio Function, VOX, Emergency Alarm, Dual Display & Dual Standby, PC Programmable
Protection	Waterproof

KEY BENEFITS

Clear Communication
Delivers crisp and understandable voice quality

Fast Team Coordination
Enables instant response & smooth operations

Reduced Miscommunication
Improves workflow and operational efficiency

Professional-Grade Build
Rugged, durable & waterproof for harsh environments

Regulatory Compliance
Meets industry standards for legal and safe operation

Long-Lasting Performance
Reliable operation throughout long work shifts

POWER CONSUMPTION & BATTERY

Transmission Current

≤ 1.3A for strong and reliable signal output

Low-Power Mode

Less than 1.0A to reduce battery usage

Standby Current

≤ 0.4A for extended standby time

Dimensions

Compact design for long working hours with minimal power loss

TRANSMISSION PERFORMANCE

High Power Output

10W for extended coverage

Low Power Output

Selectable low power for short-range use and battery saving

Modulation Mode

F3E (FM) for clear and stable voice transmission

Frequency Deviation (Wide Band)

≤ 5 kHz for strong signal clarity

Frequency Deviation (Narrow Band)

≤ 2.5 kHz for efficient spectrum usage

Spurious Emission

≤ 7.5 μW to minimize interference

Adjacent Channel Power

65 dB / 60 dB to reduce cross-channel noise

APPLICATIONS AND USE CASE

Security Operations

Guard coordination and patrol communication

Construction Sites

On-site safety and task communication

Marine & Offshore

Reliable communication in marine and offshore environments

Industrial Facilities

Facility management and staff coordination

Logistical & Warehousing

Streamlined operations and team communication

Hotels & Restaurants

Staff coordination and service efficiency

Schools & Colleges

Campus security and operations

Residential Areas

Community communication and safety

OPERATION & SAFETY GUIDE

Use Your ROVER R-5WP
Safely & Efficiently

WATERPROOF
SERIES

HOW TO USE

POWER ON / OFF

Long press the **Power/Volume Knob** for 3 seconds to turn ON or OFF.

ADJUST VOLUME

Rotate the **Power/Volume Knob** clockwise to increase volume.
Rotate counter-clockwise to decrease.
16 levels available. Level 0 turns the voice OFF.

TRANSMIT & RECEIVE

Press and hold the **PTT Button** to talk.
Release to listen. During transmission LED turns **RED**. During reception LED turns **GREEN**.

SWITCH CHANNELS

Push the **Channel Toggle** up for lower channels, down for higher channels.
Long press to switch channels quickly.

BATTERY & CHARGING

CHARGING

- Charge before first use.
 - Connect the charger to the radio or use the USB charging cradle.
 - Charging indicator:
 - RED Light** – Charging
 - GREEN Light** – Fully Charged
- Full charge takes approximately **4 to 5 Hours**.

BATTERY CARE

- Do not overcharge the battery.
- Unplug the charger once fully charged.
- Store the battery in a cool, dry place.
- Keep away from heat sources and direct sunlight.

BATTERY SAFETY

- Use only the original battery and charger designed for ROVER R-5WP.
- Do not short-circuit the battery.
- Do not dispose of the battery in fire.
- Slight warming during charging is normal.

SMART FEATURES

DUAL STANDBY

Monitor two channels simultaneously

VOX HANDS-FREE

Voice activated transmission

EMERGENCY ALARM

Instant alert for critical situations

CTCSS / DCS

Reduced interference & secure communication

PC PROGRAMMABLE

Easy configuration via software

UHF TWO-WAY RADIO

KNOW YOUR WALKIE TALKIE

Every part matters.
Built for performance and
durability, the R-5WP
ensures seamless
communication in
demanding environments.

Front View

KEY FEATURES

- 1 Antenna**
Connect the supplied antenna here.
- 2 Channel Knob**
Using to adjusting the channel and frequency.
- 3 Power/Volume Knob**
This control toggle the transceiver's power on/off and adjust the volume level.
- 4 Speaker**
The internal speaker is located here.
- 5 Microphone**
Sound input
- 6 LCD Display**
Displays frequency, channel and other status information.
- 7 Keypad**
Used to enter menu and confirm the key.
- 8 CALL (T-Call)**
Activate T-Call (1750Hz) for repeater access and transmit DTMF signaling.
- 9 PTT (Push-To-Talk)**
Press it to transmit and release it to receive after your transmission is completed.
- 10 MONI (Monitor)**
Press and hold this key disables the noise squelching action, allowing you to hear very weak signals near the back-ground noise level.
- 11 Mic/Speaker Jack**
Used to connect headset or external programming cable. Programmable via PC programming software.
- 12 Li-ion Battery**
For charging the radio.
- 13 Charging Contacts**
Connect to charger for battery charging.
